## Website for International Conference using HTML5 and CSS3

---

### Learning Objective -

To develop a Website for an International Conference using HTML5 and Cascading Style Sheets. Also to use all 3 types of CSS (inline, embedded and external), box model and styles for various HTML elements. To write rules with rule cascading and inheritance. Finally, to include animations and transformations.

### Programs -

## Learning Outcomes -

1. I successfully designed a website for an International Conference using HTML5 and Cascading Style Sheets.
2. I learnt how to use inline, embedded(internal) and external CSS. I also understood the box model and how to adequately space and position various elements on the website.
3. I understood rule cascading, inheritance in CSS and successfully applied these concepts to change the default font of most text elements to 'Georgia/Serif'. I also used these concepts in several other minor places.
4. I implemented an infinite scrolling bar that displays sponsors using CSS animations. I used transitions and transformations to make attractive committee member profile cards. These two were the most challenging parts of the website.
5. Overall, it was a good learning experience about various CSS and HTML concepts.
